Professional Summary

Engineering Manager with 10+ years of experience leading engineering teams building mission-critical trading, risk management, and financial platforms. Led multi-team modernization and risk management initiatives spanning 15 engineers and multiple stakeholder organizations, delivering predictable execution, platform reliability, and operational excellence. Proven track record of driving engineering productivity improvements, large-scale platform transformations, and cost optimization programs while supporting systems processing 20M+ orders daily.

Experience

Angel One

Bangalore, India

Engineering Manager

April 2024 – Present

- Led multiple engineering pods comprising **13 engineers** (backend and QA, mid-level to tech leads), owning architecture, execution, operational excellence, and delivery for mission-critical trading and risk management platforms.
- Led modernization of a **business-critical risk reporting platform** across Product, Operations, Analytics, and **4 engineering teams**; managed dependencies, aligned stakeholders, and delivered **100% of planned modernization milestones**.
- Took ownership of a business-critical post-trade risk management initiative responsible for recovering **\$2M+ in daily shortfalls**; stabilized delivery, aligned stakeholders, and cleared **100% of the inherited backlog**.
- Improved engineering productivity through standardized development practices, streamlined review processes, and AI-assisted development workflows, reducing **lead time for changes by 70%**, **review cycle time by 50%**, and **average PR size by 72%**.
- Built a high-performing engineering team through coaching, mentorship, and growth planning, resulting in **5 promotions across two consecutive performance cycles**.
- Led architectural evolution and scalability initiatives for a low-latency risk and order management platform supporting **75M+ orders daily**, processing **4K writes/sec** and **50K reads/sec** with **P99 latency below 50ms**.
- Driving a multi-quarter cost optimization program through service consolidation, platform rationalization, and migration from licensed SQL Server databases to PostgreSQL, targeting a **40% reduction in infrastructure and licensing costs**.
- Influenced organization-wide engineering priorities by championing **system resilience and availability initiatives**, securing leadership alignment and driving adoption across multiple teams through KPI-aligned business cases.

Angel One

Bangalore, India

Senior Software Engineer

December 2022 – April 2024

- **Led a 7-engineer team** delivering the in-house order management platform supporting around **11M orders/day** at **P99 50ms**.
- Drove **architecture and design** of a self-serve, high-performance **rule engine** mitigating compliance & margin-shortfall risks; **reduced daily ops overhead by ~40%**.
- Led performance & load testing; collaborated with DBAs to tune indexes/queries, yielding **20% performance improvement**.
- **Established team-wide standards** in Go (style guides, SonarQube gates), and mentored the team in best practices improving maintainability and lifting **test coverage from 15% to 90%+**.
- Led **disaster recovery and HA setup** design efforts across the system.

- **Promoted to Engineering Manager** to expand leadership scope across additional initiatives.

Gojek

Bangalore, India

Senior Software Engineer

September 2021 – November 2022

- Led and mentored a 6-person team delivering an automated central identity verification platform processing 100 doc sets/second across 8 stages per set.
- Utilised in-house ML/AI models for categorising deepfakes and spoofs to ensure higher quality output.
- Translated product initiatives into clear technical plans, prioritized backlogs, and aligned execution across security, data, and platform teams.
- Produced end-to-end architecture & data-flow designs for reliability, scale, and observability; defined runbooks and tightened on-call response.

Postman

Bangalore, India

Software Engineer 2

August 2020 – September 2021

- Pioneered and implemented a self-serve change management platform, empowering teams to integrate with Version Control.
- Optimized core product workflow by 70%, reducing error rates by 80%.

PaisaBazaar

Gurgaon, India

Senior Software Developer

December 2018 – August 2020

- Orchestrated mutual funds platform revamp, driving key architectural decisions, managing transactions of millions of dollars daily.
- Saved 30% operations' teams daily man hours by automating previous manual tasks using incoming e-mail parsing and UI automation.
- Engaged with stakeholders to address bottlenecks and pain points, reducing customer complaints by 66%.

Blocknomic Technologies Ltd

Gurgaon, India

Senior Software Developer

January 2018 – December 2018

- Led 3 engineers in developing a cryptocurrency exchange aggregator and making crucial architectural decisions.
- Integrated with public blockchains for real-time transactions.

Seraro Solutions Ltd

Noida, India

Software Engineer

July 2016 – December 2017

- Developed an event-driven IoT tracking platform using serverless architecture and AWS services.

Technical Skills

Programming Languages: Java, Go, Python, Javascript

Tools and Frameworks: Docker, Kubernetes, Kafka, Node.js, Spring Boot, RabbitMQ, AWS, Redis, gRPC, REST APIs, Prometheus, Grafana

AI Tools: Cursor, ChatGPT

Databases: PostgreSQL, MySQL, MongoDB, AWS DynamoDB, SQL Server

Education

Guru Gobind Singh Indraprastha University

August 2012 – June 2016

Bachelors of Technology - Computer Science and Engineering

Delhi, India
